Nagi Reddy B V

KR Puram, Bengaluru, India, 560036 • nagireddybv5@gmail.com • +916304302914 • Linkedin • Github • Portfolio • Youtube

AI Engineer with 2.5+ years of software engineering experience building production-grade AI applications, distributed backend systems, and cloud-native platforms. Experienced in developing LLM-powered applications, multimodal RAG pipelines, multi-agent systems, and real-time AI solutions. Strong expertise in Python, Go, Kubernetes, AWS, and scalable microservices, with a focus on building reliable AI systems that solve real-world problems.

WORK EXPERIENCE

Junior Cloud Development Engineer — **Nov 2025 - Present**

Kamikaze Solution Pvt — **Bangalore, India**

- Designed and developed a high-availability video streaming platform using Go, AWS, and Kubernetes, supporting continuous video streaming from approximately **100,000** IoT devices.
- Developed and managed **7 microservices**, implementing service mesh, secure networking, monitoring, automated service management, and resource optimization.
- Implemented customizable, plugin-based authentication using Keycloak to secure IoT devices and service-to-service communication.
- Built a multimodal AI assistant for manufacturing support using image embeddings, visual search, and multi-agent workflows to retrieve relevant technical documents and visual references.
- Designed a document retrieval pipeline with **15–25 document** indexes to improve contextual retrieval and response relevance.
- Achieved approximately **90% answer relevance** through iterative retrieval improvements, validated using LLM-as-a-Judge evaluations in LangSmith.
- Implemented LLM observability to trace, evaluate, and monitor AI responses and retrieval quality.
- Deployed cloud infrastructure using AWS services, including S3, VPC, EFS, Route 53, CloudWatch, and secure secrets management.

Software Developer — **May 2025 – Nov 2025**

Buildnetic — **India**

- Developed backend services and APIs using Python and FastAPI for business applications.
- Built automated data pipelines to collect and process product and travel industry data.
- Developed AI-powered product matching and recommendation systems using image and text embeddings.
- Developed a custom product-matching algorithm that improved matching accuracy from approximately **60%** to **75%**, enabling more accurate identification and categorization of similar products.
- Developed LLM-based chatbots and multi-agent workflows for intelligent information retrieval.
- Worked on hotel price intelligence systems to analyze competitor pricing and estimate hotel rates based on market trends.

Software Engineer - 1 — **Mar 2024 - May 2025**

Nellsys Technologies PVT LTD — **Hyderabad, India**

- Developed backend REST APIs using Java, PHP and MVC architecture.
- Built reusable backend modules using Java, JPA and PHP.
- Integrated third-party services, including Twilio WhatsApp and Razorpay.
- Developed an admin portal that automated **100%** of the sales team's manual communication workflows, enabling one-click WhatsApp notifications and customer follow-ups instead of manual message drafting and sending.
- Handled application debugging, configuration issues and production releases.
- Participated in Agile development, code reviews, testing and CI/CD activities.

EDUCATION

Bachelor of Engineering (B.E) in Computer Science & Engineering — **Aug 2019 - Jun 2023**

Saveetha School of Engineering, Chennai, Tamil Nadu — **GPA:** 8.4

CERTIFICATIONS

AZ-104 Microsoft Certified: Azure Administrator Associate — **Sep 2026**

AZ - 305 Microsoft Certified: Azure Solutions Architect Expert — **Sep 2026**

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional by **OCI** — **Oct 2025**

PROJECTS

Pilot Kubernetes – AI-Native Kubernetes Operations (Link) — **Oct 2026**

Go, Kubernetes, FalkorDB, Google Cloud Run

- Built an AI-powered Kubernetes operations platform that models cluster resources, dependencies, logs, and metrics as a connected graph.
- Developed an autonomous SRE agent for incident investigation, root-cause analysis, dependency mapping, and remediation recommendations.
- Implemented graph-based blast-radius analysis and RBAC security analysis to identify infrastructure risks.

Autonomous Nova – AI-Powered Enterprise ERP (Link, Link) **Feb 2026**

FastAPI, React, Amazon Bedrock, Amazon Nova, AWS Lambda, Amazon EC2

- Built an AI-powered enterprise platform integrating video surveillance, multimodal voice assistance, market intelligence, and autonomous DevOps agents using Amazon Nova and AWS Bedrock.
- Integrated RAG-based knowledge retrieval, real-time WebSocket communication, and human-approved agent workflows.

SiliconGraph – ARM AI Model Compiler (Link) **Aug 2026 - Present**

C++, Python, LLVM, MLIR

- Developing a hardware-aware AI compiler that generates optimized execution graphs for ARM devices based on hardware, memory, and quantization requirements.
- Building autonomous multi-agent systems that run on mobile devices, execute tasks locally, and dynamically provision cloud VMs with credentials through a single mobile command.

SKILLS

Programming Languages: Python, Java, Go, PHP

Frameworks: FastAPI, Spring Boot, Laravel, React.js

AI & Machine Learning: LLMs, Multi-Agent Systems, RAG, Embeddings, Vector Search

Cloud & DevOps: AWS, Google Cloud Platform (GCP), Microsoft Azure, Docker, Kubernetes, Helm, CI/CD, Linux, Prometheus

Databases: PostgreSQL, MongoDB, Redis

Messaging & Streaming: Apache Kafka, RabbitMQ, Amazon SQS

AI Development & Integrations: OpenAI Codex, Claude Code, AI Agents, Custom Tool Development

AI & Observability: LangSmith, LLM Evaluation, LLM Observability, Runtime Policy Enforcement

AWARDS & ACHIEVEMENTS

- **Special MD Award – Toshiba** — Recognized for delivering high-quality work and receiving excellent client feedback.
- **2nd Prize – Gemini 3 Bengaluru Hackathon | Google DeepMind × Cerebral Valley —** Recognized for building an innovative AI-powered voice-calling agent. (Link)
- **Bonus Blog Post Prize – Amazon Nova AI Hackathon** — Awarded for the Autonomous Nova project and its technical implementation. (Link)
- **Academic Excellence Award | Saveetha School of Engineering, 2022 —** Recognized among the Top 200 Students for academic performance.
